

# ⚙️ Digital Technologies in Focus (DTiF) supported the implementation of Digital Technologies in disadvantaged schools by:

- 1. Providing generous access to curriculum experts**  
Curriculum officers shared their deep knowledge with teachers through relationships of trust.
- 2. Partnering with school leaders to support reporting**  
Strategic alignment was forged between the DT and broader priorities and school goals.
- 3. Enabling diverse models of teacher professional learning**  
Teachers developed familiarity and confidence with specialist equipment and curriculum.
- 4. Promoting teacher reflective practice**  
Teachers shared examples of innovative practice both within and across schools.
- 5. Differentiating and enriching curriculum and pedagogy**  
Student collaborative project work celebrated strengths and amplified student voice.
- 6. Activating community knowledges**  
DTiF activated community resources, including Indigenous languages and cultures.
- 7. Showcasing examples of success**  
Schools shared student success with their communities in diverse ways.
- 8. Supporting school change**  
Engagements in the DTiF supported broader school cultural change.
